PROFILE

Full-stack engineer (Angular,React,Python/FastAPI,Go) with 2+ years in software building manufacturing and monitoring platforms.

PROFESSIONAL EXPERIENCE

Software engineer, *IndustryApps Technologies Ltd* Nov 2023 – Present | Kochi

- Built a synthetic monitoring platform (JMeter, InfluxDB, Grafana, Flask, Docker) covering 9 customer tenants. It checks login and application health and raises Azure DevOps tickets on downtime. Added kill timeouts and HTTP/connection limits so a single stuck probe can't freeze monitoring,Consolidated two InfluxDB instances into one and added login trend and response time reports.
- Developed the FastAPI backend for a production scheduling platform, with JWT (RS256) auth, layered architecture, consistent error handling and a 136 test pytest suite. Implemented the scheduling logic behind the calendar views ,actual and planned dates by transactions and automatic workorder closing when all suborders close. It runs as a 30 minute background job.Built an hourly ERP to PocketBase sync service with hash based deduplication, queued retries and monitoring endpoints using a local SQLLite DB as well. Moving the push to 3 parallel workers via threads made job sync faster by 80%
- Resolved 60+ defects across the Customer HMI and Admin Angular apps, including state lost after timeout, downtime popup behaviour and job pause/stop edge cases.Delivered a defect logging form, an Active Shop Floor view, plant filtering and German localisation of the operator panel.Built TraceabilityViewFE (Angular) end to end, with navigation from MES Trace to the Digital Product Passport.

Support Executive, *Groupon Services Ltd* Nov 2020 – Nov 2023 | Bengaluru

- Streamlined website organization and implemented a feedback system that improved customer communication by 30%, technical DIY software support and cross-departmental collaboration reduced issue resolution time.

Executive, 24.7*ai* Jul 2019 – Nov 2020 | Bengaluru

- Implemented manual testing efforts for a telecom web application by developing and executing 200+ test cases across critical functionalities like product purchases and user authentication, resulting in 95% test coverage and zero compliance violations during product launch.

EDUCATION

Federal Institute of Science and Technology, *Btech* Aug 2012 – Aug 2016

Bhavans Vidya Mandir, *CBSE* Jul 2010 – Jul 2012

SKILLS

JavaScript, CSS, HTML, JSON, SQL, Java, Go, React, Angular, Vue.js, Express, Selenium, Angular CLI, Node.js, TypeScript, Mocha, MongoDB, MySQL, Git, GitHub, Azure, JIRA, npm, Webpack, Postman, JMeter, Docker, Visual Studio, Linux, Windows, Redux, PocketBase

PROJECTS

Open Source Contributor — Spindle Project Feb 2025

Refactored the frontend by modularizing HTML, CSS, and JS files, and improved the UI with updated router links. Enhanced UI/UX with better styling, consistent design patterns, and updated/fixed router link configurations for smoother navigation. Focused on above-the-fold content loading for faster initial render. Implemented image optimization strategies such as compression, using efficient formats, and lazy loading. Reduced render-blocking resources through critical CSS inlining and async JavaScript loading.

DECLARATION

I hereby declare that the above written particulars are true to the best of my knowledge and belief.
